## Professional Summary

Cloud and DevOps-focused IT professional with 3+ years of experience supporting enterprise infrastructure, automating IT operations, and administering Azure environments. Hands-on experience building AWS infrastructure, CI/CD pipelines with Jenkins, Infrastructure as Code using Terraform, containerization with Docker, orchestration with Kubernetes, and backend development using Java Spring Boot. Seeking DevOps, Cloud, Platform Engineering, or Backend Software Engineering opportunities.

## Technical Skills

Cloud: AWS, Azure, EC2, S3, IAM, VPC, Route53, CloudFront, RDS, Lambda, API Gateway

DevOps: Docker, Kubernetes, Jenkins, Terraform, Ansible, Maven, Nexus, SonarQube, GitHub

Programming: Java, Python, JavaScript, SQL, PowerShell, Bash

Systems: Linux, Windows, Intune, Microsoft 365, Active Directory, Jira

Monitoring: Prometheus, Grafana

## Professional Experience

### IT Technical Specialist – Wellington-Altus Private Wealth (Aug 2022 – Present)

- Deliver Tier 2/3 enterprise IT support across Windows, Microsoft 365, Azure and networking environments.
- Administer Azure virtual machines, identity services and storage resources.
- Automate user provisioning and administrative workflows with PowerShell.
- Manage identity and access, quarterly access reviews and security compliance.
- Support hardware, software, cloud services and endpoint management.
- Collaborate with business stakeholders and document technical processes.

### Technical Support Representative – Advantage Communications (Jan 2022 – Aug 2022)

- Resolved customer hardware, software and connectivity issues.
- Automated repetitive support tasks and documented solutions.
- Worked with cross-functional teams to resolve complex issues.

## Selected Projects

### Java Spring Boot on AWS EKS

Built a containerized Java REST API deployed to Amazon EKS with Terraform, Docker, Jenkins, ALB Ingress, Prometheus and Grafana.

### Flask CI/CD Pipeline

Automated testing and deployment of a Flask application using Jenkins, Ansible, EC2 and S3.

### AWS Lambda File Processor

Created a serverless file processing solution using Lambda, S3, API Gateway and Terraform.

### Node.js Chat Application

Deployed a Socket.IO application on EC2 with Nginx, PM2, Jenkins and Ansible.

## Education

Bachelor of Computer Science (Minor in Statistics)

University of Manitoba

## Certifications

AWS Certified Cloud Practitioner – Exam Scheduled

AWS DevOps Bootcamp
